CAREER OBJECTIVE

Looking for a Back-end position to take advantage of my passion, which will ultimately benefit the company, as well as expand my skills experience.

EXPERIENCE

Evotek, March 2020 – Present
- Using Spring Boot to build REST web services for some features.
- Add an in-memory cache layer to decrease API average latency from 300ms to 150ms.
- Use kafka as a message queue to handle throughput high submit requests, lower stress on persistent layers.
- Implement Single Site-On to create transparent login between admin and portal using JWT.
- Using Spring security for authentication and authorization and Building JPA data access layers, with Spring and Hibernate.

Wehelp, July 2019 – February 2020
- Building REST API for web and app Wehelp.vn.
- Using Jsoup, Jersey client to create bot to crawl data from page GetIt, Marry.vn, Snap.vn and crawl enterprise from yellowpage to send email marketing for enterprise.
- Using ReactJs to code frontend for page Wehelp Admin.

EDUCATION

Posts and Telecommunications Institute of Technology, Ha Noi
Electronics Engineering, 2016 – Present

ACTIVITIES
